

Simone

This is a tutorial to render the skin more beautiful!

STEP 1 – GAUSSIAN BLUR

Open the picture and use the gaussian blur (filter>blur>gaussian blur) with a big radius (10-30) [image 1]

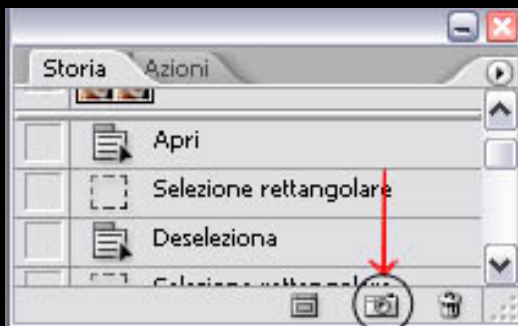

[image 1]

Now you should create a new snapshot in the history palette (Alt + click on the second icon) [image 2], give the name “snapshot one”

Now you must delete the gaussian blur (edit> undo gaussian blur), in this way you return in the original picture [image 3].

Now selected the “snapshot one” [image 4].

[image 2]

[image 3]

[image 4]

STEP 2 – HISTORY BRUSH

Now you must selected “history brush” with opacity between 25-30 % [image 5], use it only on the skin (don’t use on hairs, lips, eyes...)

The photo is of Molder http://www.scattando.it/show_portfolio.asp?IDfotografo=42

Enjoy it!
